SAFETY & SECURITY FOR GIRL STUDENTS IN THE CAMPUS

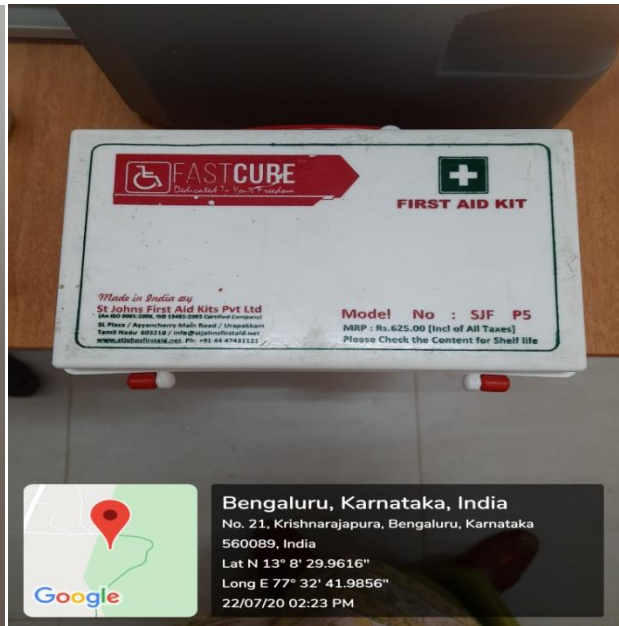

CCTV

The closed circuit cameras ensure the safety of girl students in the campus. The college is under CCTV surveillance. Closed Circuit Television is known as video surveillance. The CCTV is monitored for security purposes. The cameras are connected to a television display in Principal chamber for her monitoring. CCTVs are installed in corridors in each floor, labs, entrance, parking etc. The CCTV is installed in the hostels also.

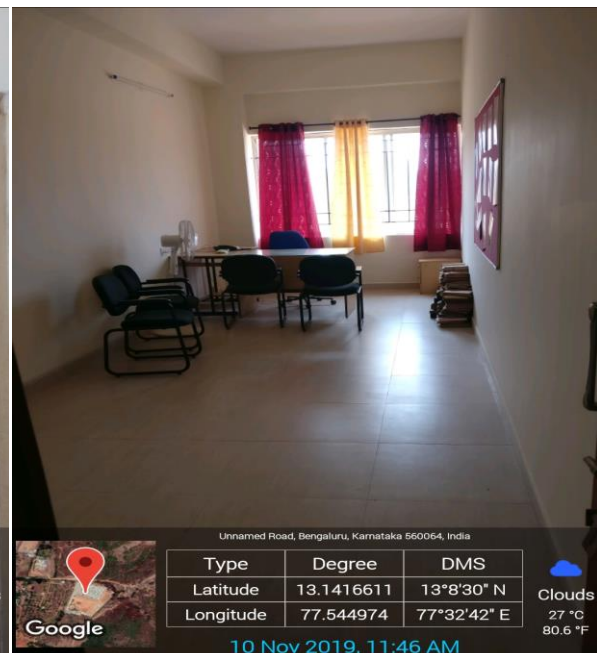

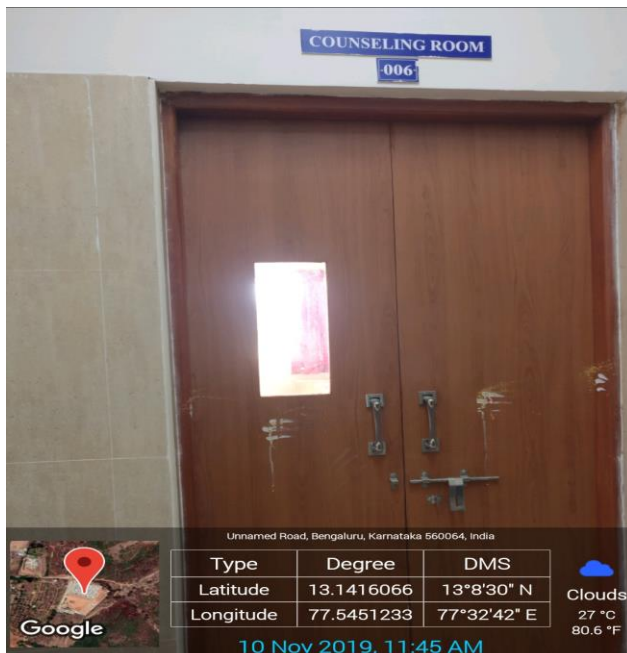

First Aid Box

The First Aid Box is available in the office. The box consists of general medicines for minor health problems. Also tincture, bandage and cotton are also available for injuries. A record book is maintained to record the medicine usage by the students' staff and supporting members in the campus.

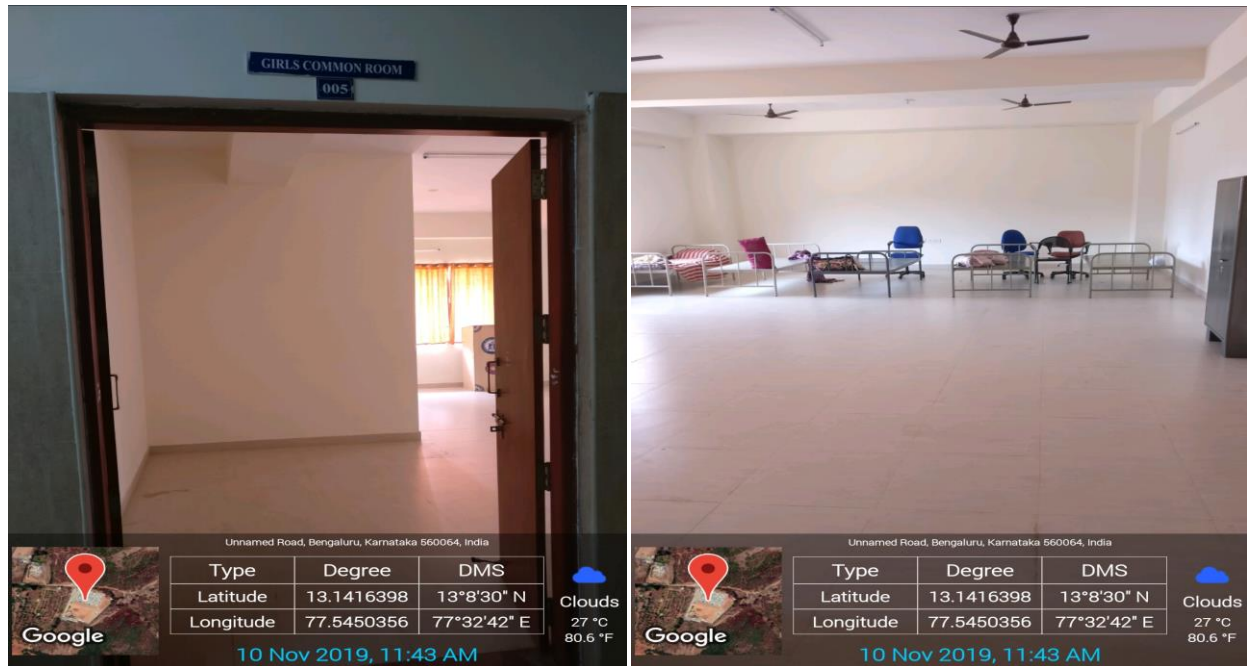

Counseling Cell

The college has set up a counseling room in the campus to help the student community address a variety of concerns that arise during the college years. The centre provides students with a opportunity to explore these concerns and problems with the guidance provided by trained and professional personnel in a confidential setting.

Girls Common Room

Personal Hygiene facility

Sanitary napkin dispenser

To maintain the personal hygiene, sanitary napkin dispenser is installed in the girls' common room in the ground floor. It is a Feminine Hygiene product, for women on the GO for an anxiety / stress free life. It makes the availability of menstrual napkins easy for women in emergency cases.

Sanitary napkin incinerator

A sanitary napkin incinerator machine is installed in the 1st floor and 2nd floor washroom for girls. It is used to dispose used sanitary napkins safely. Used sanitary napkins are often disposed of in dustbins or open surfaces, thereby giving rise to various contagious diseases or when disposed in toilets they block the sewage system. To overcome this common problem, a sanitary napkin incinerator machine is used to scientifically destroy the used napkins, thereby causing minimum harm to the environment. The machine burns the used napkins and reduces it to ash. The ash is dissolved in water.
